Subject: Re Xenadrine

I have a question for your company, how in the world can you sell something that is so deadly. I took your Xenadrine, the correct way, I even called to make sure I would take it the correct way. And 2 months ago I started having kidney problems, gallbladder problems, a scare of colon cancer, colitis, and chrones disease due to bleeding. When I brought the the bottle to the gastrologist he almost freaked telling me how can I be so brave and stupid to take something so DEADLY especially being a mom of 2 kids. The result, ephldrine messed up my insides bad. I spent over \$100.00 in the past year using this stupid garbage that almost killed me (And no i did not OD on it, I took it exactly how the bottle and your rep's explained) I have spent well over \$100.00 on Dr's visits, testing, ultrasounds, and so on. I believe your company should look deep into this and get it off the market. My friend also had a kidney and gallbladder problem from Xenadrine, and dont say its not your product because we were both very healthy till we took this crap. Now being off of it and getting the proper medication to get this junk out of my system I will NEVER recomend it to anyone. I will promlse you though I will fight to remove this product. Thank you for your time in reading my letter. [REDACTED]
